IMPORTANT INFORMATION ABOUT HARDWOOD FLOORS

Wood is a natural product containing natural characteristics such as variations in color, tone, and graining. Some variation in color and small sound knots is to be expected in a natural wood floor. Please note that the display sample may not always be a true representation of the final wood floor product. For this reason, new and/or replacement flooring may not exactly match display samples and/or existing flooring.

A natural wood floor is subject to color changes with the exposure to normal sunlight. These color changes should be expected and are a desired attribute in the uniqueness of a wood floor.
